Sir:

The Examiner indicates:

The prior art of record fails to teach or render obvious a method of cleaning a semiconductor wafer including at least one registration mark having all exclusive limitations as recited in claims 1, 19, and 30, comprising providing a semiconductor wafer comprising at least one registration mark and exposing the semiconductor wafer to a cleaning solution, the at least one registration mark comprising at least one trench having a trench width from approximately 1.0 μm to approximately 3.0 μm , the cleaning solution either comprising tetramethylammonium hydroxide and at least one surfactant, the at least one surfactant as recited in claims 1 and 19, or the cleaning solution consisting essentially of tetramethylammonium hydroxide and at least one surfactant, the at least one surfactant comprising at least one acetylenic diol surfactant.

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary, and are exemplary and not limiting.
